

AVOID THE HASSLE OF COSTLY REPAIRS WITH CLUB SEAT

SEAT drivers could receive free MoT insurance worth £75 when they put their car through its test at Hobin's.

The insurance offers financial protection of up to £750 against any items which fail the test during their next MoT a year later.

The attractive offer is open to all members of Club SEAT – the exciting global online community for fans of the sporty Spanish brand.

And as membership of the community is totally free and opens the doors to all manner of other discounts, promotions and competitions, it's an offer too good to miss.

That's especially true when you consider that the average cost of repairs needed per MoT is £90 and that motorists whose car fails first time may find themselves forking out an average of £54 to have their car tested again.

Nigel Griggs, Head of Aftersales at SEAT UK, said: 'The offer of free MoT insurance could prove a valuable one for drivers of cars over three years old as repairs to items failing the test could prove very costly and be particularly unwelcome if they are not expected.

'But in addition to this attractive offer, customers putting their SEAT through its MoT at Hobin's will enjoy a number of other benefits.

'No-one knows a SEAT better than an authorised dealer or service repair centre, where the technicians are trained by the manufacturer, all the latest technical data and equipment is available and only genuine parts are used.

'And, what's more, having your car maintained by a main dealer allows motorists to create the strongest service history and maximise the residual value of their vehicle.'

To register for Club SEAT, simply visit the community at www.clubseat.co.uk.
